Off Grid By Design

11010 Midlothian Turnpike

N. Chesterfield, VA 23235

I would like to express my pleasure with the outstanding experience I had with Off Grid By Design in the process of the design, installation and use of my residential solar array system. I found Off Grid By Design to be prompt, accurate and courteous at every step in the process. It was a pleasure to do business locally, on time, and within budget while reducing my property's global footprint for the future.

Now that I've had experience in using the system, I have been very pleased with its productivity and a net gain in energy production. Banking kilowatts with Rappahannock Electric Cooperative has been a pleasure, in addition to the tax savings.

I would heartily recommend Off Grid By Design for your consideration.

Sincerely,

Walter F. Hale, Jr.
