

The A Priori Without Magic: Notes, Typos, and Errata (Last Updated: October 2022)

Jared Warren

This document will be updated whenever new issues come to light.

The A Priori Without Magic

- CUP insisted on including punctuation within quotation marks, against my vigorous protests.
- There are a few other minor stylistic quirks of Elements volumes — e.g., swapping “this Element” for “this book” and the like, and calling chapters “sections”.
- The Elements volumes usually don’t allow a preface, but I insisted and they agreed to let me include one. On the other hand, they moved my acknowledgements and dedication to the very end of the book (page 70).
- Page 31: typo — “there are couple of”
- Page 34: typo — for some reason the “ ϕ ” in the tonk introduction rule is smaller than it should be.
- Page 35: I wrote “any collections of rules” to focus on pluralism, but “any collection of rules” probably would have read better and gotten the same idea across.
- Page 57: typo — “there is a ton indeterminacy here”
