

Spoken AAC

Spoken uses predictive technology to simplify communication for people with aphasia and other speech and language disorders. It's an entirely new kind of augmentative and alternative communication that predicts the words you want next.

Instead of limiting users to simple phrases and icons, the app predicts the next words you're likely to use so you can quickly build complete sentences. . You build real sentences quickly.

It utilizes state-of-the-art machine learning predictions and next-generation text-to-speech to help people who have trouble communicating

Spoken also learns your patterns and improves over time so users can communicate in their unique voices. It's available for both iOS and Android devices.
