

KEETER SUTHERLAND LTD

Corporate Social Responsibility Statement

KeeterSutherland respects and is committed to our role in society. We strive to meet our obligations to the communities in which we do business. We believe that by nurturing local talent, creating jobs, developing useful skills, and investing time and money in people we can achieve local sustainable growth.

KeeterSutherland emphasizes the formation of local content and local participation for energy and non-energy projects. This emphasis highlights KeeterSutherland's strategy to develop local talent and capital and thereby strengthen the country's international competitiveness. Initial investments in projects are significant and it is important to consider the benefits of focusing more on local content in the initial stages. Similarly, it is healthy to have a regional focus where private capital and participation of local companies are involved. At KeeterSutherland, we believe that the best way to ensure success is to do it "in country" first.

KeeterSutherland provides goods and services in multiple countries. We share our expertise to help set-up, train & build alliances with private local companies. Because of the cyclical nature of business, specialist contractors are needed for certain time-limited operations. KeeterSutherland enables and encourages local companies to perform these important tasks. We have to be innovative and identify select areas for local content, identify current capabilities and gaps, set targets for local capability and capacity, build those capabilities, set and maintain high standards and remain dynamic.

KeeterSutherland is committed to engage local content and transfer knowledge. We try to select partner companies who support our strategy and will help deliver high performance, learn from it and build on it for future successes.

KeeterSutherland strives to benefit local Governments and the people of the country in which we operate. We maximize the level of participation of its national people, technology and capital by utilizing locally owned businesses, local financing and human resources.

KeeterSutherland pledges to provide business advisory and support services, business development and trained skilled manpower resources for the communities and schools in which we operate.

KeeterSutherland desires to build and sustain a globally competitive company by providing local people with new and valuable skills and promoting scientific thinking and curiosity through the development of professional training and certification at the secondary and tertiary school levels.
