

# ORMERGY

## A super food for plants and soil

Contains: Bio-available essential minerals from precipitated and activated sea-minerals & sub-artesian minerals that empower plant growth and health.

### Benefits:

- Cellular respiration is increased
- Phototropism is increased
- Increases photosynthesis
- Increases carbohydrate content of sap
- Increases soil micro flora
- Increases nitrogen fixing bacteria in soil
- Increases phosphorous leaching fungi
- Improves soil tilth and aeration
- More resistant to insects and disease
- Less need for pesticides
- More drought tolerant
- More transplant tolerant
- Fruit is larger and better tasting
- Produce lasts longer on the shelf
- Mineral and vitamin content increased
- Plants produce sooner
- Crop yields are increased
- Application is easy
- Organic
- Non-toxic
- [More resistant to freezing](#)

### Application Rates:

Metric	Soils	Plants	Apply with water
Litres per hectare	5 - 10	2	100 litres
Millilitres per Square Metre	1	1	500 ml

# ActivFert

Nature's Balance

Activfert's liquid Ionic Mineral formula ORMERGY provides essential nutrients to remineralise and energise soil and plants alike. Minerals hold the electrical ground and conductivity of the soil and or plants and it's likely that you're crops are not getting the minerals they need to perform at their maximum. This formulation is a great way to supply essential minerals and other key ingredients required to maintain strong, vital, soil and plant health.

Minerals are absolutely essential for health and are the foundation for creating a healthy environment. They provide the necessary function in all systems that flows onto human and animal health. Low mineralization levels can cause ill thrift and weak plants that lead to use of insecticides and fungicides.

Activfert has created the Super Food "Ormergy" to help offset this chronic mineral shortage. Our formula contains essential and Monatomic minerals which are delivered with the assistance of Fulvic acid using ORME Technology. This delivery system allows for much greater absorption of plants and provides an instant uptake and usage. Ormergy helps to rejuvenate the soil's entire electrical system with key mineral ingredients needed for a healthier and more vital production.

This is one of the essential products provided by Activfert and most users notice a significant difference in their plant's health and vitality.
