HurriGuard® Panels Are the Clear Choice for Severe Weather Protection

- Cost effective, space-age replacement to plywood panels that are often discarded
- Transparent panels transmit light to enhance safety and security
- Reusable year after year - saves time and money and you'll have them on hand when you need them
- Strong, lightweight, and fire resistant
- Less than 1/4 the weight of plywood but far stronger
- Easy to fabricate and install with common household tools
- 10 year warranty, resists degradation from strong direct sunlight

This product is a great asset to your home or business disaster preparedness plan!

HurriGuard®

Transparent Storm Panels

The clear way to protect your home or business

**High Quality • High Strength • Cost Effective
AND Transparent**

Built to Be Strong and Built to Last Long

HurriGuard® panels are made from clear polycarbonate and manufactured to be far stronger than plywood. In addition to being amazingly strong and impact resistant these panels come in many sizes and their transparency allows light in!

HurriGuard® Meets the Standards

HurriGuard® storm panels have passed the Dade County Florida Hurricane Test. Panels were tested for resistance to impact by using an air cannon to shoot off a missile. (9 lbs. 2x4 shot). The missile bounced off the HurriGuard® panel and glass behind the panel was protected. HurriGuard® storm panels also passed testing using high air pressure that simulated 170 mph winds.
