

# REVELATION 12 SIGN - MOON CYCLES

The purpose of this study is to investigate how many times the Moon passes through the constellations, specifically *Virgo*. Precisely how many Moon phases will occur during the astronomical 'gestation' period wherein Jupiter, the *Planet of the Messiah* is within the 'womb' of *Virgo* during the Great Sign of *Virgo* as depicted in the book of Revelation 12. It appears that astronomically the Moon passes through *Virgo's* 'womb' as if to be 'birthed' 12 times or roughly once every month from the time Jupiter enters the 'womb' to when it is 'birthed' as the *Manchild*. As the Sun revolves around the 'houses' or station of the *Mazzaroth* of Zodiac, generally speaking it stays in 1 sign for approximately 30 degrees of arch or  $30 \times 12 = 360$  degrees, etc. The 12 constellations can also be configured in a 'clock' depiction that equals 12 months or a 1 year revolution. Each *Sign* is thus correlating to an 'hour' of cosmic time, prophetic time even. Out of the 12 Celestial Sign, 4 have anthropomorphic attributes. Out of the 4 main Zodiac Signs, only *Virgo* has a unique characteristic of being female but also a *Virgin* that yet 'births' the various celestial bodies such as the Sun and

Also realize that '9 months' from September 9, 2017 to December 23/24, 2016 coincides to the eve of Chanukah, on the *Rabbinical Calendar*. Many believe that Jesus Christ was conceived on a Chanukah holiday. The feast of Chanukah on the *Creation Calendar* is exactly 1 month earlier on November 24<sup>th</sup> which will be Thanksgiving in the American Union; very interesting.

This study suggests that likewise the monthly Moon cycles occurring monthly in each of the 12 constellation alludes to, as it were a menstruation cycle. This is especially true when the *Sign of Virgo* is considered. This attribute is a fascinating typology of a menstruation period. The word itself comes from the root word 'Moon'.

This monthly lunar cycle of the constellation mysteriously is tied to a human woman's menstrual cycle, on Earth as it is in the Heavens with *Virgo* in particular. This celestial time thus 'clocks' a Moon cycle roughly 12 phases once every month for 12 months, which equals a 144 (12x12) numerical coefficient.

The feast of Chanukah on the *Creation Calendar* is exactly 1 month earlier on November 24<sup>th</sup> which will be Thanksgiving in the American Union; very interesting.

One particular observation about the 12 Moon cycles or phases is that after the Supermoon, the 12 cycles begin with a *Waning Crescent* phase and transitions to a *Full Moon* to then end the 'gestation' period with a *Waxing Crescent* phase. It is an amazing tapestry of astronomical symmetry and divine clockwork. The climax occurs on the sighting of the *New Moon's* thin silver sliver on *Rosh HaShanah* of September 20, 2017.
