

Senior Accessibility & Safety Features

Realizing that safety and “ease of use” becomes more and more of a concern as we grow older, we have compiled a list of safety, maintenance, and accessibility features that you may want to consider for your home.

- Grab bars (showers, bathtubs, hallways, bedrooms) (safety)
- Bright lighting (safety)
- Non-slip floors in garage, etc. (safety)
- Emergency call button (safety)
- Home security options (safety)
- Eliminating the need for a ladder or stools (safety)
- Shower seats (Safety)
- House without pool (maintenance)
- Low maintenance landscape (maintenance)
- Filter in AC easier to change (maintenance)
- Raised Dishwasher (ease of use)
- Taller toilets (ease of use)
- Ramp (ease of use)
- Large doorways ... 28" versus 36" (ease of use)
- Temperature activated flow reducer
- Lever door handles (ease of use)
- Lower light switches for someone in a wheel chair (ease of use)
- Higher wall plugs (ease of use)
- Slide out pantry (ease of use)
- Adjustable shower heads or hand held shower head (ease of use)
