MBX14-S-210	86.1	16.2	58.4	0.8

PLOT HIGHLIGHTS

- NEW MBX18-A-237 Short season variety with high test weight, gives up some yield for early harvest
- AgriPro SY007 Steady consistent yield year after year, early harvest is a plus
- MBX17-M-245 Good strong straw that doesn't lodge, high test weight, scab is a concern
- MBX18-M-256 Lodges easy, not a good fit for the area
- NEW!! LSS 01M17 Strong standing variety that had good Scab resistance, Good test weights a plus
- MAS #6 Strong early variety, works well in all environments
- AgriPro SY100 Not as showy as last year, packs a big yield in good conditions
- MBXEXP18-69 Experimental for next year
- MBX14-S-210 Low Scab infection combined with consistent yield and test weight
