To Whom It May Concern:

It gives me great pleasure to recommend Elizabeth (Beth) Seemann, **ColoLAVAGEsm Clinical Certified Hydro-Therapist**.

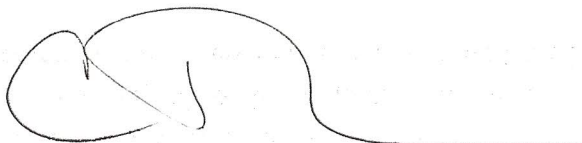

Beth recently travelled to New York where she completed training in ColoLAVAGEsm. Her experience as a Colon Hydro-Therapist and in patient care was evident. She was naturally able to adapt what she previously knew and quickly gained the techniques of ColoLAVAGEsm without any difficulty.

She effectively performed ColoLAVAGEsm on patients throughout her training and was easily able to satisfy all of the requirements of the course. At this time, she is the only colon hydro-therapist in Ohio certified to perform the ColoLAVAGEsm.

As a medical doctor, you know the biggest obstacle preventing patients from undergoing a colonoscopy is the prep. Traditionally, lower bowel cleansing required the patient to drink a large volume of oral prep. ColoLAVAGEsm is a much easier method of preparation using a consisting of a low volume oral preparation combined with specialized colonic irrigation techniques co-developed by myself (Dr. Chris Demetriou, Gastroenterologist) and Amy Sanders, Certified Colon Hydro-Therapist. From our experience, the ColoLAVAGEsm produces better bowel cleaning, better patient satisfaction, in addition to increased patient safety as compared to the conventional bowel preps.

I hope you agree that Beth is an excellent colon hydro-therapist and her ColoLAVAGEsm skills will be an enormous asset to you and your patients. Please contact me should you have any question or concerns.

Sincerely,

Dr. Chris A. Demetriou, MD
