DESCRIPTION: Here is a 57 year old Bear Cub that is still going strong. Maple riser. Bow has no delamination; no cracks; limbs are straight. Overlays and tips are in great condition. No drilled holes; No chips, dings or cracks. No stress cracks or crazing. There were a few superficial stress lines in the riser fade-outs which were filled and touched up, but are readily visible. None of the lines extend into the working area of the limb. A few minor scratches and nicks here and there. Typical yellowing of the limbs (the limbs are a uniform color but some may look more white in the pictures—a camera thing). Decals are in fair condition. Overall, this is a really nice Bear bow for its age.
