

Gavin Schieber

Automotive Technical Intern
TOYOTA MOTOR NORTH AMERICA
Quality | Diagnostics and Telematics

Since my high school graduation in 2015 from Olathe Northwest and Olathe Advanced Technical Center, I have pursued a degree in Automotive Technology with an emphasis in collision and insurance management at Pittsburg State University. I will graduate from this program May 2019. I have worked at Olathe Toyota as a proter, lube tech, and apprentice since 2013, which helped me acquire my current internship. I am currently an intern at Toyota Motor North America in Plano, TX working in Quality. I work in Service Technology in the Diagnostics and Teelematics group. I am hoping for a full-time offer this fall. I would tell anyone going through SkillsUSA that the organization is giving high school students opportunities and tools they WILL need in the future. SkillsUSA is also an excellent way to network and hone crucial communication skills.

As a high school student, I served on the 2014-2015 SkillsUSA Kansas State Officer team as Secretary. My experience serving in this role help develop my leadership capabilities and prepared me to serve others and work with teams. SkillsUSA created opportunities and developed vital ski9lls that I would have not gained if I had not joined the organization back in 2014.
