Sat 9am to 3pm, Closed Sunday

---

## 2021 Venison Processing

1. We only accept clean, boneless venison trim for sausage making.
2. It can be fresh or frozen.
3. All venison trim **MUST** be transported/stored in clean, food grade bags or containers. No garbage bags, twist ties or dirty bags or containers. We reserve the right to refuse any venison that does not smell fresh or is not properly cleaned.
4. We inspect all venison trim when it arrives and again before sausage is made.
5. We pride ourselves on making top quality sausage for our customers. Our updated equipment allows us to do this, however it does not allow us to keep batches separate. If you have any questions or concerns, please call any time.
6. All sausage is vacuum packed and frozen for your convenience. This packaging maximizes freshness and provides a longer freezer life.
7. We will call you when your order is ready for pick up. We ask that you pick your order up within 7 days of notification due to freezer space and the high volume of processing that we do.
8. It is not possible to give an estimated completion date. Processing times are determined by existing processing for non-venison customers, quantities, ingredients, scheduling of products, date received and also by product batching. We are committed to quality and strive to produce the very best product we can! Please remember quality does take time. The wait will be worth it!
9. All prices subject to change without notice due to the cost of materials and the economic climate. This price sheet is the current best estimate.

Thank you for choosing Sailer's! We appreciate your business!
