PLUMPING LIP  
BALM

PLUMPING LIP BALM is a rich formulation for lip care. Unlike other similar products devoid of water, this formulation contains up to 15% water with the highly hydrating Xilogel®. The formulation is devoid of perfume. The pleasant perceivable note is due to the content of Zanthalene®, which adds a characteristic fragrance to perfume-free formulations.

From Indena, it contains:

XILOGEL®: highly characterized polysaccharide obtained from the seeds of *Tamarindus indica*, has strong hydrating properties. Film forming, endows the formulation with a peculiar smooth and silky touch and is immediately perceivable on the lips.

ASIATICOSIDE: pure molecule obtained from *Centella asiatica*, it promotes collagen synthesis and helps the skin find a better connectival architecture. On the lips, it reduces the vertical lines at the skin/mucosae interface and improves lip appearance.

ZANTHALENE®: documented as an instant lifting agent specifically tested on the crow feet area, it provides an immediate improvement in skin roughness and reduces fine wrinkles.
