

# 2021 New Year's Resolution & Goal Setting Mobile

## Teacher Directions

Included in this kit is everything you need to get your students reflecting over the past year and ready for the new one!

### Directions for Use:

1. Color each piece of the mobile. Use lots of colors, add designs...these are going to be around for the entire year so make them fun!
2. Complete the writing on each piece. Staff will likely need to help. Go over each sheet one at a time and complete as a group.
3. Cut around each piece leaving the black line.
4. Lay a piece of string approximately 36 inches long on the table.

5. Lay the first piece (New Year, New Me!) face down on the table and use a glue stick to glue the name side to it. The pieces will have a front and back so be sure they are glued together correctly.

- 5- Continue laying the numbers (BE SURE THEY ARE IN THE CORRECT ORDER SO THE CURRENT YEAR IS VISIBLE) face down and gluing their assignment side with a glue stick.
7. Once they are glued together, hang/display them to enjoy.

### **Other ways to use the mobile:**

Ask each person to share ONE (or more) of their mobile pieces with the group. Brainstorm "good" goals, etc. BEFORE starting the project.

I hope that you enjoy sharing this New Year's activity with your students as much as I enjoyed creating it for my class! If you need further assistance or have questions, please do not hesitate to contact me. You can email me at: [createdbymrhughes@gmail.com](mailto:createdbymrhughes@gmail.com)

Happy New Year-

*John, Created by MrHughes*
