John Deere 5090 GN Tractor

The 5G Final Tier 4 (FT4) Specialty Series now brings a narrow, ultra-narrow, and low profile option to specialty applications. The 5G Series is built to operate in vineyards with a minimum working width of 108.8 cm (42.8in) from rear tire to rear tire. The 5GV Series cab, with an overall width of 108.1 cm (42.6 in), is designed to pass between narrow vineyards rows. The 5GN features an extra-wide cab of 127.5 cm (50.2 in). The 5GL series is manufactured with orchardists in mind. This low-profile tractor has an approximate height of 135.89cm (53.5 in) and width of 152.4cm (60 in.) (depending on tire configuration), which makes it ideal for operating in orchards that are laden with heavy fruit. The two-door cab on the 5GN and 5GV models offers the operator yet another convenience of entering and exiting from either side. With a distance of 560 mm (22.1 in) between the right-and-left-hand side consoles and a play of 285 mm (11.2 in.) between seat and steering wheel, the 5G Series provides one of the roomiest cabs in the specialty tractor market.
