DuroFlo™ HTC004 Hydraulic Submersible Trash Pump & 800D Drive Unit

The MWI DuroFlo™ hydraulic submersible trash pumps coupled with a diesel or electric drive unit are great for situations like: drying out construction excavations, quarry dewatering, bypassing sewage, general municipal and industrial work. MWI has a reputation of making a machine that is rugged and reliable, having great performance and low operational costs. Combined with WMS' 24/7 service plans, you can rest assured the job will get done.

Features

800D Diesel Engine Drive Unit

- Skid mounted unit
- Engine & hydraulic safety shutdowns
- Complete hydraulic systems with control panel, pump, tank, & gauges
- Small hydraulic tank reduces fluid replacement costs
- Reliable, efficient Vane Hydraulic Pump
- Environmentally friendly - inherently biodegradable hydraulic fluid
- Auto Start Stop Panel available with floats

DuroFlo™ - HTC004

- Open 3 bladed impeller for handling trash and sewage
- Easily passes 3" solids
- Runs dry indefinitely
- Oil lubricated seals and bearings
- Reliable, rugged Vane Hydraulic Motor
- Lifting point
- Cast steel volute—Weldable and shock proof
