

In her own words...Kylie Gouriluk

How could one put into the words of just a short paragraph the amazing experience of being on the 1st place Raider Team?! A year ago I never would have thought that I could be part of the extraordinary female raider team, but I was wrong. I found myself encompassed in an unforgettable and life changing experience. To be perfectly honest, at the beginning of the school year I had little hopes of making our tremendous raider team, full of drive and motivation. Yet again, I was proven wrong. My friends helped me incredibly, and I found myself doing things I never would have been able to do on my own. For example, when we were competing at states and on the last stretch of the 1 Mile Litter Carry, I was in so much pain and wanted so badly to slow down, but the other females on the team, especially the seniors, motivated me to keep going and sprint it out until we reached the finish line. I felt as though I gained such a close bond with the other members of the team that I couldn't have obtained anywhere else. From this championship winning experience, I take away lasting friendships, a greater appreciation for athleticism, and memories that will last a lifetime. Woot to Raiders!!!
