

# Use of Trackless Tack at Bus Garage & Parking Area

## GENERAL INFORMATION

*Project Title:* Bus Garage & Parking  
*Owner:* Columbus Regional Airport Authority  
*Location:* Stelzer Rd. Columbus, OH  
*Product Used:* Trackless Tack NTSS-1HM  
*Installed By:* Decker Construction  
*Install Date:* May 6, 2009  
*Contact:* Jonathan Apple  
Decker Construction

## BACKGROUND

*Reason for product use:*  
High traffic area did not want tack tracked onto Stelzer Rd.. Also looking for better adhesion between asphalt layers.

## PRODUCT DETAILS

*Type:* NTSS—1HM  
"Trackless Tack"  
*Design Type:* Used between base course and asphalt wearing course.  
*Existing Product:* Asphalt

## INSTALLATION

*Weather:* 60 degrees/foggy/overcast  
*Comments:*  
Installation was completed in less than 45min. The tack was "cured" and dry to the touch in 20 minutes.

## RESULTS

No tracking onto Stelzer Rd. The construction was easier and quicker as the parking crew could get on the tack much earlier than normal emulsions. Expect to achieve better adhesion between layers since the trackless tack is actually there during construction.
