

Keep all samples cool and out of the elements, in a cooler with an ice pack during the heat of the summer and out of freezing temperatures during the winter.

Shipping Samples:

1. Securely package samples - use packing materials to prevent samples from breaking. Secure in plastic bags.
2. Include client information - Name, Address, Phone number, Fax Number, Email address
3. Include check if not an established client.
4. Ice not required, unless outside temperature is above 100 degrees.
5. Ship overnight if possible - prevents samples from sitting in a non-temperature controlled environment (freezing/overheated warehouses).
