

Extreme STEAM & Sports Camp

1029 MacArthur Blvd.

Mahwah, NJ 07430

Calling All Explorers! Join us this summer on an exploration into the world of STEAM (Science, Technology, Engineering, Art and Math)! In this full day camp, children will participate in a variety of experiments, projects and engaging challenges for half of the day and participate in a series of fun sports/physical educational challenges for the second half of the day! Each week will focus on a different aspect of STEAM, as well as the connection between sports and STEAM!

So if you would like to have your child experience learning in an exciting way that will enrich their lives.....

"Come Explore With Us"

Week 1 (9am -3pm): STEAM Challenge: In this problem based camp, children will vie to find creative solutions to science related challenges. One day they will be a NASA Engineer challenged with creating a vehicle that can land safely on Mars, the next day a Civil Engineer tasked with building a bridge that holds the weight of a bag of sand and many more fun "real world" challenges!

Week 2 (9am-3pm): Sporty STEM: In this project based camp, children will explore the scientific connection between sports and science. They will design and create their own waterslide, football goal post, basketball hoop and shooter, and much much more!

Week 3 (9am-3pm): Amusement Park STEM: Does your child love rides? If so this is the perfect camp for them! Each day they will design and build an amusement park ride and learn about the physics behind some of their favorite rides!
