

## Why Buy a Star2Star Phone System

### ***Incredible capability and cost savings compared to other communications systems***

Lines may be pooled and calls may be distributed across all locations – Reducing the total numbers of needed Lines

Unlimited voice mail included with smart phone integration so you never miss a call

Create an unlimited set of voice menus leading to individuals, departments, recordings, custom applications, or other menus where destination can include other locations

Outlook integration – click and call from Contact list

Thousands of Long Distance minutes included factored across all lines

### ***Fully distributed communications platform***

Never Get a Busy Signal – Star2Star automatically “bursts” phone lines on demand.

Never Miss a Call - Inbound calls can failover to cell phones, other locations and/or to multiple queues.

With the correct escalation path you should never miss a call

### ***Customized disaster recovery and business continuity***

The entire phone system is monitored End-to End 24x7x365

Data Center houses all key call processing functions including in-bound call distribution, auto-attendant, unlimited voice mail, and conferencing.

No single point of failure among customer sites

Dual WAN capability, Cell phone failover, analog line backup

Inbound calls failover to alternate extensions, locations or individual cell phones.

### ***Superior Quality of Service***

Quality weighted BGP Internet routing Control and Traffic Shaping from End-to-End

Optimized voice compression via superior G.729a codec offers more efficient bandwidth utilization for More Calls and Exceptional Voice audio

Quality of Service (QOS) on your network prioritizes voice calls

24 hour advanced replacement warranty on all equipment

Prequalifies the integrity of the connection prior to installation

Supports 911 / E911
