NATURAL SPRING WATER

Balamar
springs

Water in a bottle that matters.

Pure

Glaciers created Canada's Niagara Escarpment which now provides the pure natural spring water of Balamar Springs. Balamar Springs produces water in special Tetra Pak cartons to maintain the purity of the fresh spring water.

Unlike some bottles, our aseptic bottles are BPA free—no harmful chemicals—just natural spring water from a pristine source free of pesticides and chemical fertilizers.

Balamar Springs
good for you

Easy

Balamar Springs' special packaging keeps water 20% cooler longer. Our bottles fit effortlessly into cup holders in your car and seal securely. With a twist of the lid you can take a sip and then close it tightly to avoid spills. The bottles are easily collapsible to take up less space, so you can toss a bottle of Balamar Springs in your gym bag, lunch bag, or purse when you are on the go. Enjoy the convenience and purity of water from Balamar Springs.

Balamar Springs
good for your family

Green

By drinking Balamar Springs water you can help save the planet one bottle at a time. Balamar Springs' bottles are made of paper from trees grown in a managed forest where each year more new trees are grown than harvested. Our bottles are printed with water-based, solvent free printing inks. The award winning aseptic cartons received the Presidential Award for Sustainable Development.

The bottle matters.
Be an environmental champion.
Drink Balamar Springs.
