## How to Make Dulce De Leche

### Ingredients

1 can sweetened condensed milk, unopened, label removed

### Step by Step Instructions

Place unopened can of sweetened condensed milk in a crockpot that is filled with water to cover the can.

Set crock pot on low and allow to cook for 9 to 12 hours but no longer than 16.

The longer you allow the milk to cook, the darker your caramel will be.

If you have a large crock pot, you can make several cans at one time and save energy and when they are done, allow them to cool and mark them with a sharpie and place them on your shelf.

Unopened the Dulce De Leche should last up to 1 year.

**Enjoy!**
