Recognize Fact Families

Using Symbols

5, 6, 11

$5 + 6 = 11$ $11 - 6 = 5$

$6 + 5 = 11$ $11 - 5 = 6$

5, 5, 10

$5 + 5 = 10$ $10 - 5 = 5$

Using Words

Two addends and their sum can be used to make a fact family. Each fact in a fact family uses the same three numbers.

The three numbers in a fact family make two addition facts and two subtraction facts. The greatest number is the sum in the addition facts and the first number in the subtraction facts.

If the two lesser numbers are the same, the three numbers make one addition fact and one subtraction fact.

1 2 3 4

$$7 + 4 = 11$$

$$12 - \square = 9$$

12, 11, 10, 9
1 2 3

$$12 - 3 = 9$$

Using Words

For an addition sentence, begin with the given addend and count on to the given sum.

For a subtraction sentence, begin with the greater number and count back to the lesser number.

Choose the Correct Operation to Solve a Word Problem

Shauna bought 8 apples and 4 bananas. How many pieces of fruit did Shauna buy in all?

1. **Find:** how many pieces of fruit Shauna bought in all
2. **Choose the operation.** Use **addition** to solve problems that ask for how many in all or for the total number. Use **subtraction** to solve problems that ask for how many more or how many are left. Use addition in this problem.
3. **Solve.** $8 + 4 = 12$ pieces of fruit
4. **Is the answer reasonable? Explain.** Yes, the total number of pieces of fruit is greater than the number of apples and is greater than the number of bananas.
