

GoWild-Gubinge aka Kakadu Plum

Australia's Original Global Supplier

Our wild harvested GoWild-Gubinge fruit aka Kakadu Plum is the richest source of Vitamin C and Ellagic Acid from a natural plant

100% whole fruit powder and fluid extracts

GoWild Australia only uses the freshly harvested and freeze-dried pulp, never the kernel. Which is another potential difference from other suppliers

With consumers trends towards “clean” and “green” products, and with the natural antimicrobial properties in the plum, the GoWild-Gubinge, aka Kakadu Plum, can potentially replace chemical preservatives used by the seafood industry, ' said Mintel.

Introducing the Kakadu Plum: Clean label's rising star ingredient that replaces chemical preservatives

Kakadu Plum, an edible fruit produced by trees in the tropical woodlands of Australia, has emerged as a superfruit with antimicrobial properties that could replace chemical preservatives used by the seafood industry... Read
