

OUR BEAUTIFUL TIMBER FRAME PAVILIONS ARE BUILT FOR STRENGTH AND STYLE WITH SOLID WOOD BEAMS

Timber frame pavilions are an instant backyard classic, and are the perfect structure for anywhere people gather to socialize or relax, or they can be used for carports, boathouses and more. Kits include rough-sawn, traditional beams complemented by $\frac{1}{4}$ " steel plate joinery for unparalleled strength, and beautiful tongue and groove southern yellow pine 2 x 6 undersheathing. Each is sized and packaged per your specifications and customization.

EASTERN WHITE PINE

The beautiful timbers used in your pavilion are locally sourced from carefully managed forests, including some from the Great Smoky Mountains.

The white pines are a timeless American treasure, used to build countless cabins and barns of early settlers, and still loved by the region's residents today.

Cover: 28' x 30' Pavilion stained in Cavern Oak. Roof is Dual Black Shingles at 8/12 roof pitch.

Below: 10' x 12' Pavilion stained in Cavern Oak. Roof is Standing Seam Metal in Copper Penny at 5/12 roof pitch with optional 24" overhangs.
