

UL FIRE ALARM SEMINAR

FIRE ALARM PLAN REVIEW and DESIGN BEST PRACTICES

HOSTED BY

Underwriters Laboratories

Join us for an informational and educational presentation addressing "Fire Alarm Plan Review and Design Best Practices". This program is written for the Fire Marshal and Fire Inspector perspective.

PROGRAM

The course explores the basic fundamentals of fire alarm design and review through code requirements. You will gain knowledge of reviewing/designing plans for fire alarm systems and the components of input devices and notification appliances. Course development was through the International Fire Code, Manufacturer's Instructions, Listings, the NEC and NFPA 72 as well as practical experience from the author.
Open to the first 36 people who register. Late registrations cannot be honored.
