

MODEL 7002 HEADER TANK

The purpose of a header tank is to allow for the steering gear fluid to expand and contract due to temperature variations.

The header tank can be used on a manual-filled system as well as on an auto-filled system. The capacity of this tank is one quart (one litre). It is available with or without sight glass and breather.

It is recommended to have this tank installed above the highest helm pump onboard ship. In addition, a manual-filled system should be installed with a breather or an auto-filled system should be sealed with a vent line going from the header to the main tank.

The KOBELT expansion tank is die cast in bronze and is very durable in the marine environment.

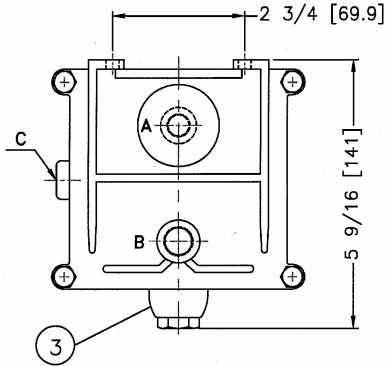

ORDERING INFORMATION

7002-A	With sight glass
7002-B	Without sight glass

Addition of a designation code "C", e.g. 7002-AC, will add a breather to the unit.

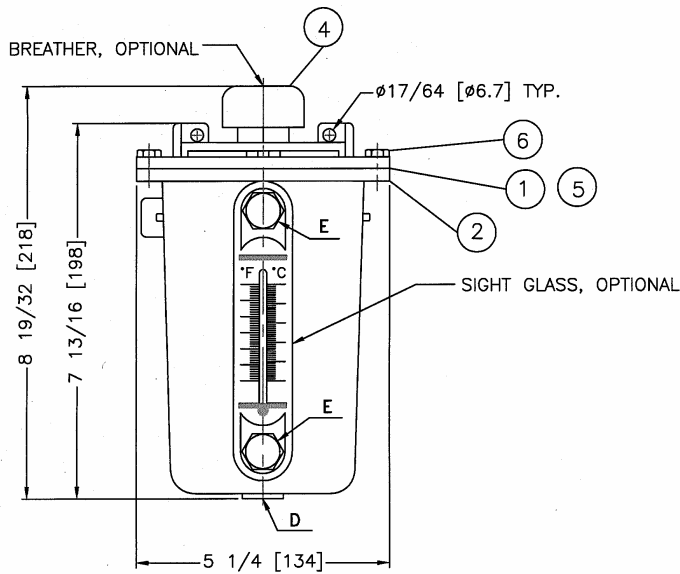

Weight: 6.6 lb. (3 kg)

DIMENSIONS AND PARTS LIST MODEL 7002

Item	Qty	Part No.	Description
1	1	7002-0001	Cover
2	1	7002-0002	Tank
3	1*	7002-SG5T	Sight glass
4	1*	7002-MB02	Breather
5	1	1101-0250	"O" Ring
6	4	1001-1008	Hex head screw

* Optional

Port / Thread Size

A	1/4" NPT
B	3/8" NPT
C	1/4" NPT
D	1/4" NPT
E	M12x1.5
