- See counselor for application process

Program Description

The **Health Occupations I** program will provide students with the basic theory and clinical experience for entry-level positions in a physician's office, hospital or outpatient clinic. Students will participate in classroom learning consisting of both theory and hands-on demonstrations and practice as well as have the opportunity to participate in internships/job shadow experiences with local health care professionals. The curriculum provided allows students to explore their interest in many fields within the medical profession, including but not limited to: nursing, medicine, advanced practice nursing, physician's assistant, laboratory science, emergency, medical terminology, radiology, surgical technology, and nuclear medicine.

Health Occupations II (Pharmacy Technician) program prepares students for employment in hospital and retail pharmacies, as well as for post-secondary careers in Health Science. Pharmacy Technicians assist licensed pharmacists in providing medication and services under the supervision of a pharmacist. This program also prepares students to take the National Pharmacy Technician Exam and meets the state CTE program requirements. The Pharmacy Technician program offers work-based learning experience, which gives practical experience in the field of Pharmacy.

Special Features

Leadership opportunities are available through participation in HOSA, a student organization for those in the health career.

Work-based learning opportunities available.

STATEMENT OF COMPLIANCE

The Downriver Career Technical Consortium complies with all federal laws and regulations of the U.S. Department of Education. It is the policy of the Downriver Career Technical Consortium that no person on the basis of race, color, religion, national origin or ancestry, age, gender, marital status, disability or limited English proficiency shall be discriminated against or excluded from participation in any program or activity to which it is responsible or for which it receives financial assistance from the U.S. Department of Education. Furthermore, the consortium will encourage participation by all of the above.
