FINISHING MACHINERY

UV COATING OPTIONS

**GLASS-19
& GLASS-25**

SUV-24 Plus

**SUV-18
& SUV-24**

Shark Finishing Machinery introduces to its Smart line of digital print finishing machinery a variety of coating options. We offer standard UV Coaters (SUV-18 & SUV-24) as well as a line of GLASS™ Coaters. Our Glass-19 & Glass-25 coaters are unlike any other coater on the market today by offering a super shiny Glass like finish that is glossy enough to be mistaken for lamination. The SUV-24 PLUS offers this unique glass like finish as well as a “soft touch” finish. These coaters are one-of-a-kind machines that are competing with the lamination industry. Now you can offer a glass like finish at a fraction of the cost and time of lamination. These coaters are all low-maintenance, ultra-violet light, curing coating systems, which provide a durable and high-quality finish to your printed sheets using traditional UV liquid with outstanding results on both offset and digitally printed stock.

- For Offset and Digital
- Uses traditional UV liquid
- Several sizes available
- Maximum thickness up to 0.09”
- Maximum length – NO LIMIT
- Variable Speed
- Easy clean-up
