VORTEX COULTERS

The latest advancement in coulters blade technology! This blade is an excellent choice when being used on a planter ahead of a spiked closing wheel, or when additional stirring is needed. An excellent replacement for a "Turbo" type coulters.

These blades have been a **proven** improvement on the Great Plains vertical tillage tool straight or angled units, **angling of the gang is not necessary**. The stirring action causes dirt to move without scraping the ground forming a horizontal tillage layer. Thousands of acres prove this blade to be a very **intelligent investment!**
