2017 Soybean Yield Performance

Brand	Variety	Yield	Moisture	Rank	Maturity
Asgrow	AG3034	94.75	12.9	2	3
Asgrow	AG30X6	88.5	12.1	4	3
Asgrow	AG30X8	85	12.1	11	3
Mycogen	5N312R2	88.2	13	5	3.1
Asgrow	AG32X6	87.6	13.1	8	3.2
Asgrow	AG32X8	89.9	12.6	3	3.2
Asgrow	AG33X8	88	12.3	7	3.3
Mycogen	5N334R2	86	12.8	10	3.3
Pioneer	P33T19X	83.8	12.8	13	3.3
Asgrow	AG34X6	84.8	12.6	12	3.4
Mycogen	5N343R2	88.1	12.8	6	3.4
Asgrow	AG35X7	87.1	12.6	9	3.5
Asgrow	AG36X6	95	13	1	3.6

Previous Crop: Corn
 Planting Date: 5/3/2017
 Row Width: 30 inch
 Population: 150,000
 Field Average: 86.2 Bu/A

Although we had rough start this spring soybean yields have been exceptional this year. Asgrow beans continue to bring great genetics to the table as well as a few old favorites that remained very consistent. The Xtend trait has proved to work well and grown yield. As you can see from the plot we have many options from the 3.0 to 3.6 maturity range. We use plots like these to narrow down the selection process for the area. AG3034 have been very good for the area for a few years now and showed well again in the plot. AG36X6 was new last year and showed promise in last years testing. It has been testing well again this year and has a great drydown time for 3.6 maturity bean. Coupled with the Xtend trait it seems to be great choice for high producing acres as well as acres that need additional weed control. Mycogen also had a strong showing in the plot. Solid genetic lines prove to have consistent yield year after year. Either of these lines can be treated with our new custom treatments at an economical price.
