

Hamilton Chapter

Do you ever wonder how you end up with just one sock? Do you have a large inventory of singleton socks in your inventory at home? What about at work ... how is your inventory accuracy there? Join us for our November PDM and hear from our guest speaker how to deal with inventory inaccuracies (and some pizza & pop).

November 24, 2016 Professional Development Meeting

PDM Topic: Odd Socks and Inventory Accuracy

We all know what socks are and that they come in pairs. We all know why we need pairs of socks, and we all know that eliminating the odd-sock basket gives us more pairs of socks.

Not everyone can relate to inventory accuracy to the same degree as an odd sock. But everyone needs to know about inventory accuracy at that level of detail. Everyone needs to know what inventory accuracy is, why we need it and how to get it.

So let's take a look at inventory accuracy, one odd sock at a time.

Speaker: Louise Beauchamp CFPIM

Louise has been a senior management consultant with DBM Systems Inc. for the past 25 years. Bilingual in English and French, Louise has consulted with global corporations, assisting them in implementing change and moving toward best practices. She is known as a thought leader on the inventory accuracy component of supply chain management.

She has taught numerous inventory accuracy courses, and her inventory/

shop floor knowledge has made her a highly-sought trainer in our large global customers.

Louise is APICS certified at the fellowship level in Production and Inventory Management and is recognized by APICS as a Master Instructor for CPIM. She was presented the Voluntary Service Award by APICS in September of 2016 at their international conference. She continues as an APICS volunteer at the chapter, district and corporate levels.

Louise launched her book "Crack the WIP - Best Practices for Work Cell Reconciliation" in 2009, and published "Odd Socks and Inventory Accuracy" in December 2015.
