

We have 4 high probability setups. 2 of the setups trade in the direction of the trend. These include the Continuation Bar Setup and the Thrust Bar Setup. All trends have pullbacks and trends do not last forever. We have 2 additional setups that fade the market. They are known as the Reversal Bar Setups and the Bollinger Reversal Setup. We use indicators to help us identify our setups and they are available for purchase. If you are interested, please click the Contact Us tab above and we will help you.

CL Crude Oil trading \$10 per tick per 1 lot

**Reversal Bar Setup**
