

From Crash to Courtroom (16 Hours)

Team Muir will present a step by step process to prepare the student to handle their next crash with confidence.

The student will analyze several types of crashes and learn alternative approaches when faced with roadblocks.

Students will receive a hands on tutorial from the crash scene scene-evidence identification and collection to processing the information and calculations. This includes a courtroom preparation block for easier courtroom presentation and testimony.

Students will take away a number of sample reconstruction reports for their future use.

About IATAI
