

Water Report for January 5, 2022

The water system is in good working order, with the following of interest:

The community 2021 yearly water usage amounts were sent to Sandra (K/W); the four quarter amounts adding up to 1,924,277 gallons. From this amount K/W will figure our wastage and report to us at the annual meeting. A list of pending items was included, and listed below.

Pending issues with King Water:

1. The overcharge for Aprils' reservoir cleaning; this issue may have been closed,
2. Resolving the high shipping charge for the 5 HP pump,
3. K/W replacing our five bags of greensand,
4. Resetting of the vault behind the reservoir,
5. ID'ing the three valves outside the well house door,
6. Installing the 5 HP pump.

Respectfully,

Dave Shellenbarger, Sky Meadows Water Coordinator
