ANG InfoTech SAP EMS provides:

- Short-term and long-term improvement plans.
- Implementation and post-implementation support
- Custom application development, upgrades.
- Application integration
- Business process re-engineering initiatives
- Help in developing reports to meet statutory requirements
- Expertise in Interface development with third party applications.
- QA Reviews and Solution reviews
- SAP Support - onsite or remote teams.

SAP STAFFING SOLUTIONS

Our ability to deploy qualified SAP professionals is rivaled only by our deep dedication to service and reliability. This commitment isn't just something we talk about, it's part of who we are and it shows in everything we do.

At ANG InfoTech, we look for individuals who are not only leaders in their field of expertise but who also have the drive to team with other colleagues and clients. We recruit people with true strength of character and integrity and we treat every assignment as another step toward building long-term relationships.

WORKFLOW SOLUTIONS

Total SAP workflow solutions for entire procurement process to manage purchase requisition to purchase order releasing based on value approach with or without SAP HR organization structure, with Microsoft outlook integration.

RFID SOLUTIONS

By leveraging enterprise applications and RFID technology, organizations can achieve higher operational efficiency and reduce operational costs. Real-time visibility and accuracy of information on materials in the supply chain provide 'physical information' residing in the enterprise applications to enable better management of assets.
