Hi Penny,

Here is the newest chart of area lights.

100 watt active lights 76 and 250 watt active lights 83 so the total active lights is 159.

If you have any other questions, I'm just an email away. ☺

Cheryl, I've looked at this chart that you sent me over 3 years ago (!!), but can't for the life of me figure out how many active lights we have in KCPOA. Just need a number to tell the Board. ex: 79 total. I added up the "Active Qty" column, but that just doesn't seem right???

Can you help, please and thank you. :)
