DESCRIPTION: The 52" Wing Thunderbird is among the best short hunting bows ever designed. This one is from the original Bob Lee Wing era (before Head/AMF). Great looking and performing re-curve. No delamination; no cracks; limbs are straight. Overlays and tips are in great condition. No drill holes. This bow has been refinished. It had a lot of crazing that needed to be removed. The only significant flaws with this bow are the superficial stress lines (see pics) in the limbs near the riser. These were filled with Loctite, but are readily visible but do not adversely affect performance.
