

## Immune-related Adverse Events with Cancer Immunotherapy: Case-based Challenges for the Oncology Nurse

### Learning Objectives:

- Assess the clinical efficacy, unique response patterns, and safety profiles associated with checkpoint inhibitors in various types of cancers.
- Evaluate the signs and symptoms of immune-related adverse events (irAEs) associated with checkpoint inhibitors and understand how to differentiate these from other etiologies.
- Review recent ASCO/NCCN guidelines for the management of irAEs and apply these recommendations to optimize patient care.
- Using a case-based approach, discuss strategies oncology nurses can employ to overcome real-world challenges to the early recognition and appropriate management of irAEs.

Victoria Sherry, DNP, CRNP, ANP-BC, AOCNP  
Adult Oncology Nurse Practitioner for Thoracic Malignancies  
Abramson Cancer Center  
University of Pennsylvania Medical Center  
Advanced Senior Lecturer  
University of Pennsylvania School of Nursing  
Philadelphia, PA

Dr. Sherry is an Adult Oncology Nurse Practitioner for Thoracic Malignancies at the Abramson Cancer Center at the University of Pennsylvania Medical Center in Philadelphia, Pennsylvania. She is also an Advanced Senior Lecturer at the University of Pennsylvania School of Nursing where she teaches both undergraduate and graduate students. Dr. Sherry attended the Catholic University of America where she obtained her Bachelor of Science in Nursing and went on to receive her Masters in Nursing at the University of Pennsylvania where she graduated with a degree as an Adult Oncology Nurse Practitioner. Dr. Sherry went on to obtain her Doctor of Nursing Practice from Duke University where her dissertation focused on distress screening and management in patients with metastatic lung cancer. She is a member of the Oncology Nursing Society (ONS) and the Philadelphia Area Chapter of the Oncology Nursing Society (PACONS). She is also a member of the Xi Chapter of Sigma Theta Tau.
