

## The Queen Bee:

1. She is the Mother of all the Bees in her hive:
2. She lays approximately 1,500 to 2,000 eggs per day:
3. She can sting repeatedly, normally only stings other Queens, if there is more than one Queen they fight to the death:
4. She mates with the strongest Drone:
5. She mates only once in her lifetime, once she is mated she is fertile for her lifetime:
6. There is only one Queen per colony:
7. Her life span is from 2 to 6 years:
8. Her main diet is Royal Jelly:
9. It takes 15 to 16 days from egg to birth:
- 10 Her only job function is to lay eggs:
11. Nobody is the boss, everything is done on instinct:
