Introducing GTA EnviroNomic™ Model Village

The size of an
EnviroNomic™ Model
Village will be
approximately 7 Hectares
or 16.8 acres of land

Affordable Home ownership goes hand-in-hand with:

- Employment
- Maintaining Children at school
- Programs include but not limited to:
- Environmental awareness and practice
- Home economics & the meaning of a free carbon footprint as an incentive to homeownership
- Family health and personal hygiene
- Education on the prevention of HIV/AIDS and other communicable diseases
- Character building and family values
- Vocational guidance and training
- Youth mentoring programs through the media of film and proactive sports participation
- Participation in training programs delivered by professionals to help residents integrate into their new environment and way of life.

SITE OVERVIEW

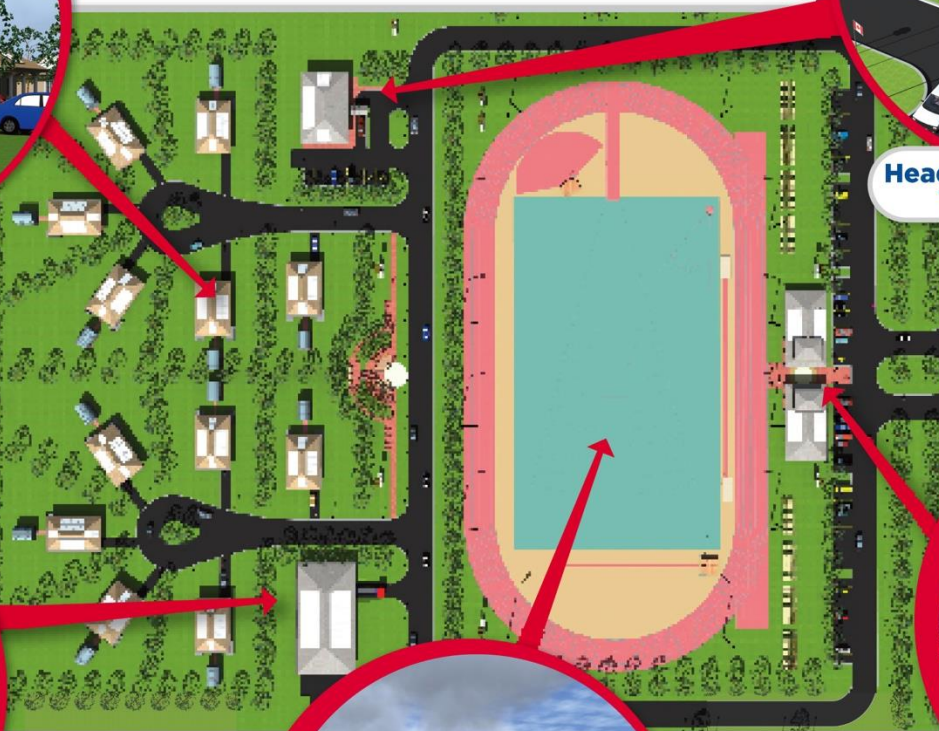

Model Home

Headquarters & Volunteer Training Facilities

The Emergency Preparedness Centre

Sports Facility

Community Centre

The Canadian Model

- Home ownership brings to light the need for self-sufficiency,
- Pride of home ownership and community
- A place where people are proud of calling it their home and where to bring-up their families

GROUND FLOOR PLAN

SIZE: 90M²

Environmental Compliant

- Construction materials, fixtures and fittings
- Extensive use of energy saving equipment:
- Geothermal cooling systems
- Solar Panels and Solar Water Heating Systems
- Small “silent” wind turbines on solar
- Solid waste disposal through vacuum technology
- Use of green houses per residence
- Use of water recycling technology

Designed to provide a Carbon Free Footprint

- Each house in the EnviroNomic™ Village comes with its own year round vegetable garden.
- Introduction of incentive programs using carbon credits to reduce capital sums on each micro mortgage and as a means of augmenting income if authorized to sell excess energy capacity into the electric grid.

COMMUNITY CENTRE

The Community Centre will house:

- A day care centre for pre-school children
- A after school study and research facility for school going children
- An indoor Gymnasium, (Basketball, Volleyball, and Karate)
- A Seniors day care centre that will include a series of programs i.e. computer skills development, art, music, dancing and others delivered by qualified volunteers
- Career development and vocational classes to help people improve their employment opportunities.

Sports field and running track

“Mens sana in corpore sano”

“A healthy mind in a healthy body”

- Pope John XXIII

“Today’s youth need more than ever to be engaged in competitive sports activities to prepare them for the challenges facing them in their professional careers, rather than being drawn to unhealthy life styles or crime.

Emergency Preparedness Centre

Ready for deployment 24-7

- Equipped with disaster response equipment:
- Search
- Rescue
- Recovery
- Victim Care
- Fully qualified group of Volunteers that serve on a roster basis 24/7 to respond to major
- Natural Disasters and others throughout Canada and the world

On Guard for Humanity Headquarters & Volunteer Training Facilities

- Made-up of Professional from all walks of life; and
- Students from Collages and Canadian Universities needing to earn credits towards their post graduate degrees;
- Who give their time, resources, know how and dedication to serving others
- Creating New Jobs without Impacting on tax payers
