

FACILITIES PLANNING

The Board of Directors recognizes that planning of facilities is an ongoing process that requires resources to carry out short and long-range facilities planning responsibilities. The executive director shall establish a facilities planning process that includes:

1. Coordinating a process to identify, evaluate, validate, and document capital improvement needs.
2. Maintaining and updating a comprehensive list of capital improvement needs.
3. Maintaining complete and current educational and technical specifications.
4. Providing facility needs data and background information for development of short and long-range capital improvement programs.
5. Maintaining permanent facility project record documents and providing facility record information.
6. Conducting a thorough technical evaluation of proposed school sites.
7. Providing consultation, research, and information on facility matters.
8. Keeping abreast of educational program changes/trends and their facility impact.
