

Hi! My name is Alex. I recently graduated from UT with my masters in microbiology. I've always been an avid lover of fitness and have had an interest in gymnastics since high school. During my time at UT I discovered the Texas gymnastics club team and fell in love. The change in myself and my outlook on life over the course of my years at UT has led me to pursue my passion of fitness and education. Which is why I'm here, hoping to teach your kids a little about gymnastics and a little about life. I look forward to a session of fun and learning!
