

Island Internal Medicine La Conner Medical Center

Chronic Care Management Program for Medicare patients

Our goal is to make sure you get the best care possible from everyone that is involved with your care. As a patient with two or more chronic conditions, you may benefit from a new program that Island Internal Medicine / La Conner Medical Center (IIM/LCMC) is now offering all Medicare patients.

- **Benefits of the plan include:**

- ✓ We will provide you with a comprehensive care plan
- ✓ We can help coordinate your visits with other doctors, facilities, lab, radiology, or other testing
- ✓ We can talk to you on the phone about your symptoms
- ✓ We can help you with the management of your medications

- *Your Primary care clinician will oversee your Chronic Care Management program. Other staff will work with you as well but your primary clinician will oversee all call provided by our staff*
- *You will receive a comprehensive Care Plan from our practice to help you understand how to care for your conditions so that you can be as healthy as possible.*
- *As needed, we will share your health information electronically with others involved in your care while we continue to comply with all laws related to the privacy and security of your health information*
- *We will bill Medicare for this chronic care management for you once a month. Medicare will cover the fee for this service, and your portion will be your current copay (if applicable).*
- *Our office will have a detailed record of our time spent managing your care and will available for you to review upon request.*
- *Only one provider can bill for this service for you. Therefore, it is important to choose which provider is best able to treat you and all of your conditions.*

We want to provide you with the best care possible. We know your time and your health is valuable and we hope that you will consider participation in the program with our practice.
