

Weather Shield®

FIBERGLASS REPLACEMENT
EASYGLIDE SLIDING PATIO DOORS

Want More

Easy Glide Fiberglass French Sliding Patio Doors feature rich oak-grain textured panels that give the look of wood and the no worry performance of fiberglass. Clad exterior frames and a weather and wear resistant sill provide additional protection from the elements.

Easy Glide Fiberglass French Sliding Patio Doors feature 1-3/4" thick polyurethane filled panels with a painted wood grain textured interior. High performance sill and perimeter weather stripping keep the elements outside where they belong. A clad frame can be coordinated to match aluminum or vinyl clad windows.

Featuring

Zo·e·shield™

The World's Best Energy Glass

Zo-e-shield™ glass utilizes tomorrow's technology today to deliver comfort and energy savings.

- Real Warm Edge Spacer helps control condensation build-up
- Proprietary design exponentially improves energy performance for thousands of dollars in energy savings over the life of your home
- Specially formulated coating protects home interior from up to 99.9% of harmful UV rays
- Easy Care™ coating breaks down dirt and reduces water spots for easier, less frequent glass washing
- Coating optimization provides solar heat gain control and brilliant daylighting

CHOOSE THE ZO-E-SHIELD 5 STANDARD ENERGY PACKAGE

Zo-e-shield™ 5	
U-Factor	.24*
Solar Heat Gain Coefficient	.27*
UV Protection	95%
Visible Light Transmittance	66%
Number of Glass Panes	2
Laminated Glass	No
Premium Screen	
30 Year No Rot Warranty	

OR UPGRADE TO THE ZO-E-SHIELD 6 ENERGY PACKAGE

Fiberglass Patio Door Key Features:

The **fiberglass door panels** make our patio doors one of the most durable and energy efficient doors manufactured today. The fiberglass is scratch and dent resistant and won't warp or become brittle in extreme climates. And because it does not rot or corrode, it is an ideal solution for coastal applications.

Our unique **Real Warm Edge Flexible Spacer** between the panes of glass insulates the edge of the glass better to help improve thermal performance and reduce condensation.

The heavy-duty clad exterior frame features a rigid **integral nailing fin** for greater structural integrity and easier installation.

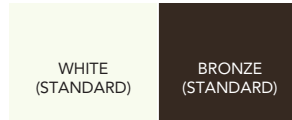

EasyCare glass is an additional, invisible, permanent coating of Titanium Dioxide that reacts chemically with the sun's UV rays, causing organic materials that are on the glass to decompose. When it rains, the decomposed dirt washes away, the water spreads out and evaporates quickly for fewer spots and easier cleaning.

As a proud ENERGY STAR® partner, we ensure our products are rated, certified, and labeled for U-Value and Solar Heat Gain by the National Fenestration Rating Council (NFRC).

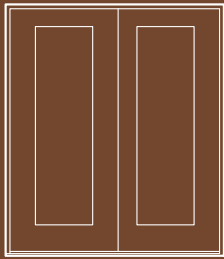

Interior and Exterior Color Choices

The painted exterior finish meets AAMA 625 standards against fading, peeling or flaking. Two standard options are available.

Colors shown may not be actual representations. Actual color samples are available upon request.

For upgrade options, contact your Weather Shield representative.

FRENCH SLIDING

Hardware Choices

Weather Shield's all-metal patio door hardware features two- and three-point locking systems, plus matching adjustable hinges, in a Brushed Nickel finish. An optional key lock is also available.
