

KITSAP COMMUNITY HEALTH PRIORITIES, 2019 Quantitative Assessment

NOTE: This list only includes the top 25% ranked indicators.

The following pages include high level summary information for indicators in the quantitative report. In the columns labeled A and B, a green arrow up or down indicates better over time or compared to WA State; red is worse; a black arrow up or down indicates a statistical change that is neither better nor worse; and a horizontal black arrow indicates no statistical change over time or not statistically different from WA. In the columns labeled C and D, Y indicates a 10% or greater difference (disparity) between any sub-county geographic area or race/ethnicity group, N indicates no difference. A cell is left blank in columns A-D means those data were not included in the report.

11/14/2019

Indicator Name	Annual number			A	B	C	D
	of residents affected	Most recent value	Most recent year	Kitsap's statistical trend or year to year comparison	Statistical comparison of Kitsap to WA State	Geographic disparity	Race/Ethnicity disparity
