

“Let the children come to me...”

What the youth are saying about Source + Summit

This weekend was eye opening and life changing. This retreat was well balanced between learning, teaching, and fun / games. I have learned life long lessons of how to live a life as a child of God and truly understand a Mass.

This weekend changed my life! I'm already looking forward to next year. Don't change a thing.

This weekend at Source & Summit has changed my life completely. This weekend has changed my life for God. This weekend was amazing.

I loved this experience. This was my first time here. It really helped improve my relationship with God. I could help next year.

I loved this weekend a lot. It helped me get closer to God and open up to God.

I thought S&S was a fantastic retreat that lit a fire in my heart.

This weekend was an amazing way to get away from the real world and reform my faith in Christ. Keep on doing what you're doing.

The adoration was great and I felt that God was truly present and looking at us and helping us.

This retreat could quite possibly be the highlight of my entire year! I look forward to this retreat every year and I am honored to be a part of it.

The weekend was the best experience I've had. I love how we act like a family. We pray and sing together. I loved it and I am definitely coming back next year!

I loved the community feel when everyone was singing and praying together.

It really helped me get closer to the thoughts of my vocation.

I liked how we were like a family.

This was my first source & summit retreat and I really enjoyed it. I never knew how amazing an experience it could be.

This was my third year here and I still leave with tears in my eyes.

I love it. Last year I had to be with my sisters, but this year is so much better since my friends were here and I was open to a lot more people and made many new friends.

S&S is honestly just so amazing. I look forward to it every year and hate leaving. I just love being with Catholics. I just can't stop smiling. :)
