Flat 7, 124 King's Road  
London  
SW3 4TP

Dear Sirs

**Re: Mitre House, 124 King's Road, SW3 4TP**

Thank you for your telephone enquiry and we have pleasure to give below our quotations to upgrade our rented Entryphone system at the above site;

To replacing the existing 5900/C10-type hammer bronze entrance unit with a 9200/C10-type unit in either brushed or polished stainless steel

for the sum of £111.90, plus VAT

To replacing the existing 5901-type telephones with 201-type instruments

for the sum of £28.80, plus VAT, each.

Should any parts of the system be defective, they can, of course, be replaced on a like-for-like basis at no charge under the terms of the rental contract.

We trust that our quotation may prove acceptable, and we may be favoured with your instructions.

Yours faithfully,  
THE ENTRYPHONE COMPANY LIMITED

Dear Sirs

**Re: Mitre House, 124 King's Road, SW3 4TP**

Further to our quotation of 22<sup>nd</sup> February and your subsequent e-mail, we have pleasure to give below a further quotation;

To replacing the existing 5900/C10-type hammer bronze entrance unit with a 9200/C10-type unit in polished brass

for the sum of £174.90, plus VAT

**Polished Brass Entrance Units**

As requested, we have allowed for the entrance unit to be in polished brass. However, please note that we have not yet managed to find a satisfactory lacquer, which will, for any reasonable length of time, protect the polished finish of a brass entrance unit. The unit therefore will tarnish unless it is maintained by the regular use of metal polish and we can make no undertaking to keep it clean. These units are made to order and this may involve some delay.

We trust that our quotation may prove acceptable, and we may be favoured with your instructions.

Yours faithfully,  
THE ENTRYPHONE COMPANY LIMITED
